For the purposes of the analysis of the amount and structure of the remuneration of NIS BoD members, the data from the report of PricewaterhouseCoopers Consulting d.o.o. Belgrade (hereinafter referred to as - PWC) was used on the amount and structure of the remuneration of non-executive (inclusive of independent) directors of leading international petroleum companies.

Please find below a more detailed description of the companies participating in the survey:

<b>Name of the company</b>	<b>Country</b>	<b>Net revenue in 2019 (1.000 EUR)</b>	<b>Correlation between X/ NIS</b>

CAIRN ENERGY	UK	343.581	0,1

With a view of significant differences among the surveyed companies in terms of their size and geography, two subgroups were created. Statistical analysis of non-executive (independent) directors' remuneration was performed as per these groups, which resulted in a higher level of transparency and comparability:

**Group 1:** this group consists of petroleum companies (BP, ENI, REPSOL YPF S.A., Royal Dutch Shell (ON), TOTAL).

**Group 2:** this group consists of medium and small petroleum companies (John Wood Group (former Amec), CAIRN ENERGY, Petrofac, EQUINOR (former Statoil), Tullow Oil plc, MOL, OMV Group, PGING, PKN Orlen).

For the purpose of comparability, same petroleum companies and same groups are used as in market research last year.

The structure of remuneration of non-executive BoD members of reference group is simple and usually equal to:

- Fixed amount of annual/monthly remuneration dependent on the size of the company and effective position (chairman, deputy, member);
- Additional payments for participation in committees dependent on the function performed (chairman or member of the committee), type of the committee (bigger remuneration for Audit committee). However, some organizations include these additional payments into a fixed amount of the remuneration from the outset;
- Other elements of the remuneration such as additional payments dependent on the number of meetings per year; retirement allowances, etc. are applied much less frequently.

<b>Overview of the amount of annual short-term remuneration market ranges of non-executive members of the Board of Directors of petroleum companies (EUR, net)</b>	
<b>Groups:</b>	<b>2019</b>
Group 1	55,000 – 177,000
Group 2	19,000 – 85,000
<b>NIS</b>	Fixed part of remuneration for BoD membership is 80,000.

An analysis of the reference group remuneration market shows that the amount of the annual fixed remuneration of the non-executive members of the NIS BoD is at the level of the cumulative remuneration received by the non-executive members of the boards of directors of companies such John Wood Group (former Amec), CAIRN ENERGY, Petrofac, EQUINOR (former Statoil), Tullow Oil plc, MOL, OMV Group, PGING, PKN Orlen.

The remuneration structure of the independent members of the NIS BoD is also consistent with the current market practices because it includes the main elements of fixed remuneration of a member of the Board of Directors.

Taking into consideration that NIS j.s.c. Novi Sad is a growing Company with ambitious plans in all areas of business, the objective of which is to attract and retain highly competent non-executive directors with work experience with major international oil and gas companies, the main issue related to retention of such directors is a competitive size of remuneration.

Accordingly, the structure and amount of the remuneration received by members of the NIS BoD is consistent with the principles, framework and criteria that are laid down by the effective Remuneration Policy for the members of the BoD and Commissions of the BoD.
